

# *Discover* *the* *Difference*

Many water supplies, municipal and well, contain hardness minerals (calcium and magnesium). These minerals form a scale and create problems in water heaters, washing machines, dishwashers, coffee makers, humidifiers and plumbing systems. Nelsen Scale Prevention Systems are designed to eliminate these problems providing your family with a refreshing difference, saving you money now and in the years ahead.

NELSEN SCALE PREVENTION SYSTEMS, feature FILTERSORB SP3<sup>®</sup> Technology. This technology transforms the calcium and magnesium carbonate (temporary hardness) of the water into mechanically stable and heat resistant calcite crystals (nanometre size) which no longer cause lime deposits. The calcium and magnesium crystals are rinsed away.
